The Honorable James Lankford  
316 Hart Senate Office Building  
Washington, D.C. 20510

Dear Senator Lankford:

Thank you for your opposition to vaccine mandates and commitment to vote to defund the Biden mandates in the upcoming government funding battles.

These federal mandates violate the basic liberties of Americans of all stripe.. Whether they work in the federal government, serve in the U.S. military, are employed by a federal government contractor, are a health care professional who just last year were hailed as heroes and now face being fired or have a job with an employer of more than 100 people, Congress needs to stop the enforcement of these Biden administration mandates now.

By taking this action, Congress will ensure that the President will have to seek their approval for any action designed to impose the federal government's power over those who exercise their rights to make health care choices that fits their unique situation. This is the right response as any pretense of an emergency has ended, yet the entanglements of the regulatory state remain intact.

Thank you again for working with Senator Mike Lee in asserting Article One authority over these administrative state actions. I urge you to communicate with other Senators encouraging them to put an end to this unconstitutional Executive branch overreach immediately by voting in favor of amendments to the Continuing Resolution which would end enforcement of them.

Sincerely,

Richard Manning  
President
